

We don't sell technology. We sell results.

THE PROMISE

An IT partner for
businesses of every
size.

Hand us your pain points. We'll turn
them into profit.

Tell us what hurts →

BUILT AROUND YOUR BUSINESS

Dependable support. A workable partnership.

Even the smallest business deserves dependable technical support. This catalog is the menu: solutions already built, already deployed, and working for businesses like yours.

An auto body shop in Bloomington. A plumber's office in Nashville. A chiropractor in Columbus. A property inspection company covering every county in Indiana. Start with what hurts; we build around your branding and your workflow.

CLEAR SCOPE. AGREED TERMS.

Traditional payment, service trades, advertising exchanges, or a combination.

Every partnership starts with a clear scope, agreed value and commitments on both sides. We agree on the next steps before work begins.

Getting hacked, sued or shut down

Locked Doors On Your Website;
Backups That Actually Work;
Lawyer-Proof Setup; Disaster
Recovery Plan

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART I · FILL THE CALENDAR

Fourteen calls came in today. You answered six.

Your competitor answered the other eight. Not because they're better. Because they picked up the phone.

WEB · 24/7

The Silent Closer

A friendly conversation on your website answers questions about prices, hours and services, then books the appointment. It works around the clock, even at two in the morning.

VOICE · BILINGUAL

The Receptionist Who Never Calls In

A real-sounding voice answers calls, handles questions and books appointments directly into your calendar. Spanish-language conversations help customers who might otherwise hang up find their way to a booking.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART I · 3-6 OF 9 SOLUTIONS

Catch the work that gets away.

SCHEDULING

The Live Booking Calendar

Customers choose a time on your website without phone tag. The calendar checks your actual availability, so it only offers open slots and avoids double-bookings.

OUTBOUND · NIGHTLY

The Daily Hunter

Automated local prospecting looks for people in your area who need what you sell. It runs daily, bringing opportunities to your business without a morning of dialing.

LEAD CAPTURE

The Lead Catcher

Capture who a visitor is and what they wanted, even when they leave before finishing the form. Follow up on the interest that might otherwise disappear.

SMS · AUTO

The Missed-Call Recovery

When you cannot answer, the caller gets a friendly text back instantly. Keep the conversation open and give missed calls another path to becoming booked work.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART I · 7-9 OF 9 SOLUTIONS

Follow through on every opportunity.

NURTURE

The Follow-Up Machine

Text each new lead, nudge outstanding quotes and ask for reviews at the right moment. Follow-up keeps moving without becoming another task on your desk.

ANALYTICS

The Traffic Tattletale

See where customers came from, what they clicked and what prompted their call. Use that view to understand which advertising is earning its place.

REVIEWS · AUTO

The Review Harvester

Send a gentle review request after a good experience, on the platform that matters to your business. Customer concerns go to you first so you can address the problem.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART II · RUN THE BUSINESS

Sundays were never supposed to belong to paperwork.

The reports, the receipts, the invoices, the follow-ups: none of that should be your weekend.

FIELD → REPORT

The Report Writer

A technician captures photos, measurements and findings by speaking into a phone at the job site. That information becomes a branded report delivered to the customer, before the trip back is over.

VOICE ENTRY

The Talk-To-Type Field Tool

Crews speak instead of typing on small screens. The tool records conditions, materials and measurements so field notes move faster and the important details get written down.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART II · 3-6 OF 9 SOLUTIONS

Finish the job. Finish the paperwork.

WORKFLOW

The Technician Dashboard

Guide every technician through the same sequence: en route, on site, working and done. Required steps and before photos stay part of the job, rather than something someone remembers later.

PAPERLESS

The Digital Sign-Off

The customer signs on the phone. Approval is recorded and filed in seconds, without a paper form to chase or a promise to send it later.

PAYMENTS

On-Site Card Processing

Take a card payment at the customer's property and send a branded receipt straight to their inbox. Finish the payment while you are still on site.

REVENUE

The Upsell Menu

Show the standard service alongside optional extras on the same screen. Customers can add the work they want, giving each job room to grow without a hard sell.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART II · 7-9 OF 9 SOLUTIONS

Keep the business moving.

COLLECTIONS

The Invoice Chaser

Unpaid invoices receive polite, persistent follow-up until they are paid. The reminders keep moving without relying on your memory or putting you in the chasing role.

ACCOUNTING

Books That Balance Themselves

Payments, receipts and expenses are sorted and categorized for your accountant. Keep the records ready throughout the year so April does not begin with a scramble.

DISPATCH

The Dispatcher

Match each call with the technician who is nearby, available and equipped with the right truck. Coordinate the job without a whiteboard, group text or another dispatch call to you.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART III · LOOK BIGGER THAN YOU ARE

Your customer doesn't care how big your team is.

They care how big you look. Give a one-truck operation the presence of a regional business, without the regional overhead.

WEBSITE

A Real Custom Website

A custom site built for your trade, your town and your customers. Designed from scratch and fast on phones, it gives your business a polished presence that earns its keep.

CONVERSION

High-Converting Landing Pages

A focused page turns a campaign click into a phone call. Built in a day for a seasonal promotion or an ad, then tuned to improve the response.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART III · 3-7 OF 12 SOLUTIONS

Show up where customers look.

RESCUE

Website Rescue

We take over a slow or broken website, fix the problems and make it fast. You keep your domain and get a site you can feel comfortable sending customers to.

DELIVERABLES

The Customer Portal

Give customers clean, secure links to their reports, videos and invoices. A clear delivery experience makes finding the finished work feel as straightforward as tracking a package.

SEO · PROGRAMMATIC

A Page For Every Neighborhood

Create a page for every city, town and ZIP code you serve, written with local landmarks and local language. This approach is already in production for a statewide Indiana service business.

SEO

Top Of Google For Your Town

Improve your visibility for your trade in your area with useful content and sound site structure. Help neighbors find your business when they search for the service you provide.

GEO · AI ANSWERS

Get Recommended By ChatGPT

Build your business's presence in answers from ChatGPT and other AI assistants. When someone asks for a local recommendation, your business is prepared to be part of the conversation.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART III · 8-12 OF 12 SOLUTIONS

Let your reputation do the talking.

LOCAL · MAPS

The Map Pack

Manage your Google Business profile with current posts, photos and reviews, supporting visibility in the top three Google Maps results for nearby searches.

REVIEWS

The Review Ladder

Automatically ask happy customers for a review at a moment when the experience is fresh. Build the reputation that supports stronger, lasting visibility in local search.

REVIEWS · TRIAGE

Bad-Review Interception

Route unhappy customers to you first so you can resolve their concerns before they become a public review. Give a difficult experience a better ending.

ENGAGEMENT

Review Response Handling

Every review, positive or negative, gets a thoughtful response in your brand's voice within the day. Customers see a business that is attentive without you logging in to reply.

SOCIAL PROOF

Social Proof Everywhere

Put your strongest reviews to work on your website, landing pages, ads and follow-up emails. Let customers hear from the people who have already chosen you.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART IV · BE EVERYWHERE WITHOUT WORKING MORE

You are one person. Your content says otherwise.

Put content, marketing and customer service to work around your day. Your business stays present while you get on with the job.

CONTENT

The Writer Who Never Sleeps

Articles, blog posts, service pages and newsletters, all in your voice. The existing client workflow produces more than 800 pieces a year with about an hour a week of the client's attention.

SOCIAL

The Social Media Sidekick

Keep posts on schedule, the feed active and comments answered. Stay familiar to your audience without opening Instagram while you are on a job.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART IV · 3-7 OF 12 SOLUTIONS

Turn one idea into more opportunities.

VIDEO · REPURPOSE

Long-To-Short Video

Turn one job-site video into twenty short clips for TikTok, Reels and YouTube Shorts. Captions and hooks are included, giving one filming session a month of posts.

VOICE-FIRST

Blog From A Voice Memo

A ten-minute voice memo about a job becomes a blog post, an email and five social posts. Capture what you know from the truck without sitting down at a keyboard.

ADS

Done-For-You Ad Campaigns

Campaigns for Google, Facebook, Instagram and local directories. We handle creative, copy, targeting and ongoing tuning so you can focus on answering the inquiries.

EMAIL · SMS

Email & Text Campaigns

Newsletters, promotions, seasonal reminders and messages to win back quiet customers. Written in your voice and sent when they are relevant to the people on your list.

AUTOMATION

Seasonal Automation

Schedule spring tune-ups, pre-winter check-ups, back-to-school specials and other recurring reminders. The right message returns each year without another calendar task.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART IV · 8-12 OF 12 SOLUTIONS

Keep the conversation going.

PROSPECTING

Sales Outreach On Autopilot

Find and research prospects, prepare a personal-sounding message and send it. Interesting replies come to you, keeping outreach moving while you do the work.

QUOTING

The Quote-From-Photo Tool

A customer texts a photo of a dented fender, leaky pipe or cracked driveway and receives a ballpark quote in about sixty seconds. Make the next step toward booking simple.

SUPPORT

The Q&A Specialist

Answer the questions customers ask most often, all day, in your voice. Unusual questions are escalated to you so your time goes to the conversations that need you.

OUTBOUND

Outbound Reminder Calls

Appointment confirmations, follow-ups and review requests delivered in a real-sounding voice. Complete the calls you rarely have time to make yourself.

BILINGUAL

Multilingual Customer Capture

Bilingual conversations and booking help Spanish-speaking customers get past the voicemail barrier. A full translation is handed to you for the next step.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART V · SLEEP AT NIGHT

The bad day is coming. You'll be ready.

Locked doors, real numbers, and one clean system instead of twelve overlapping bills.

SECURITY

Locked Doors On Your Website

Protect the front door of your website by blocking attacks and unwanted bots. The setup addresses eighty common ways attackers get in, reducing avoidable exposure.

BACKUPS

Backups That Actually Work

Customer information, job records, photos and reports are backed up automatically, encrypted and recoverable. A failed laptop or hard drive does not have to take the records with it.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART V · 3-7 OF 12 SOLUTIONS

Protect the business. Know the numbers.

COMPLIANCE

Lawyer-Proof Setup

Put privacy policies, data handling rules and deletion rights into your setup. Organize how customer information is handled and reduce the gaps that can turn into expensive problems.

RECOVERY

Disaster Recovery Plan

Give each system a written recovery plan. When a fire, flood or other disruption happens, there is a clear route back to work rather than a plan to invent under pressure.

DASHBOARD

The Owner's Dashboard

Bring leads, jobs, revenue, top services and customer sources onto one clear screen. See the numbers you need without digging through an analytics tool.

ATTRIBUTION

Where The Money Came From

Connect advertising spend to booked jobs and revenue. Understand which marketing activity produces work so you can make informed decisions about the next dollar.

INTELLIGENCE

Competitor Watch

Follow competitors' search rankings, prices, ads and reviews as they change. Keep the information current so changes in your market do not arrive as a surprise.

I Fill the calendar

II Run the business

III Look bigger

IV Be everywhere

V Sleep at night

PART V · 8-12 OF 12 SOLUTIONS

Make the moving parts work together.

ALERTS

Sales Alerts On Your Phone

Get a phone alert when a real prospect arrives on your site or a payment reaches your account. Stay in the loop without living in your inbox.

AUDIT

Subscription Bloat Audit

Review recurring account charges and flag services you no longer need. Most clients find savings on the first pass that cover the audit fee.

INTEGRATION

Make Your Tools Talk

Connect your calendar, email, accounting, field app and customer list. Enter a customer once and move the details between the systems automatically.

MIGRATION

Move Off The System You Hate

Move customers, history and files out of the software that no longer fits. Settle into a system built around the way your business actually works.

CRM

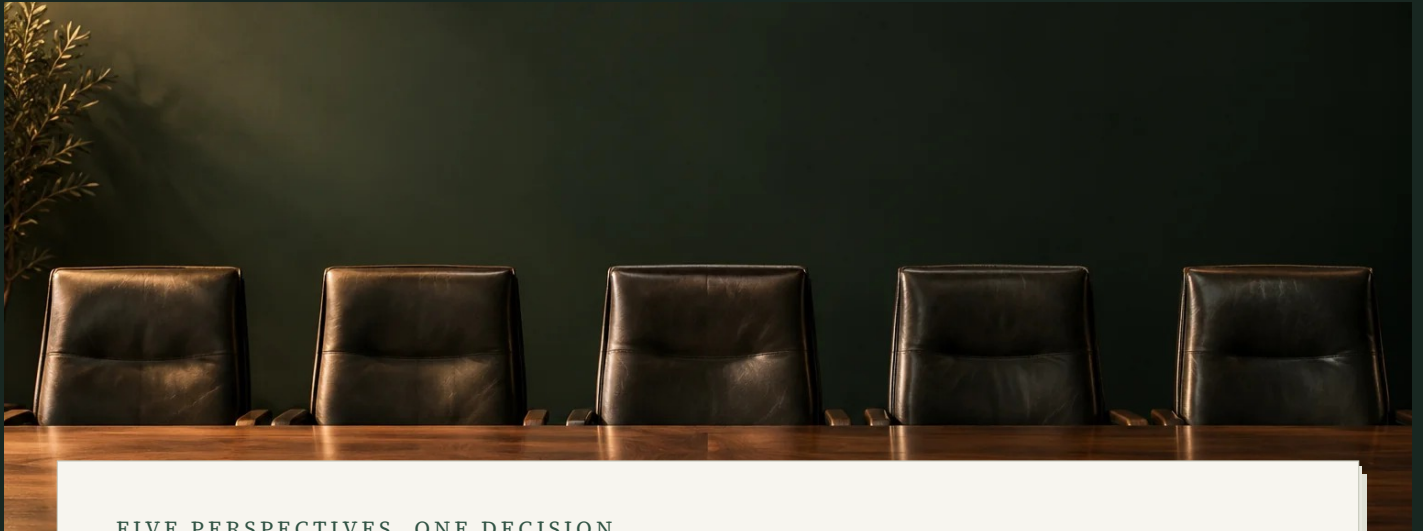

Customer List That Actually Works

Set up your customer list properly and load the records you already have. Replace fragile spreadsheets with an organized system your business can use.

PART VI · BEFORE YOU SLEEP ON IT

Take it before the board.

FIVE PERSPECTIVES. ONE DECISION.

Five senior advisors.
Five perspectives. Zero yes-men.

Bring a real business decision: hiring, pricing, an acquisition or a pivot. The board argues it through and returns a full report with a majority recommendation, dissent, risks and next steps.

Convene the Board →

One free session per visitor. Deliberation takes roughly 30 seconds.

The Counsel

5 sessions / month

The Boardroom

15 sessions / month

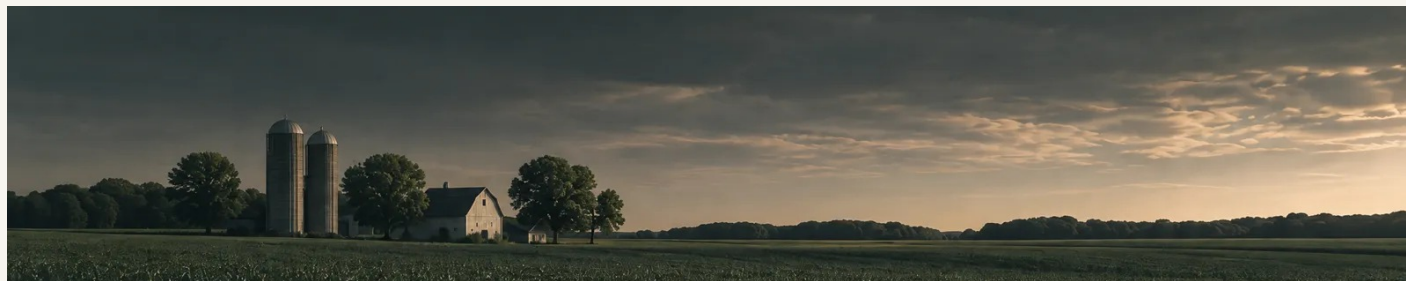

The Standing Seat

Always on; tuned to your
industry

Standing-seat owners receive the same deliberation on retainer. Ask Douglas about a seat.

PART VII · HOW WE WORK TOGETHER

Five steps from hello to results.

01 You tell us what's broken

30 MIN CALL

Describe the missed calls, lost leads or paperwork eating your weekends. A conversation about your pain points. No pitch.

02 We agree on the plan

BEFORE WORK BEGINS

We put the scope, price and timeline in writing. Most projects begin with a deposit. For service trades, advertising exchanges or combined arrangements, we agree on value and commitments up front.

03 We build. You see it working.

1 SESSION

We configure, customize and test, then walk you through the solution with your branding and workflow. You know what done looks like before we start.

04 We go live together

DAY ONE

We launch your solution and help you put it to work. Payments follow the agreed schedule, with milestones for larger projects.

05 We keep making it better

ONGOING

Monthly reports, quarterly reviews and ongoing improvements. You have someone to call instead of returning to figuring it out yourself.

BUILT FOR THE TRADES WE HAVE SERVED

Your business. Your way of working.

INDUSTRY 01

Auto Body & Collision

Insurance referral follow-up, instant estimates from photos and status texts that keep customers informed about the repair.

INDUSTRY 02

Plumbers, HVAC, Contractors

Answered calls, scheduled jobs, field reports and photos delivered before the truck is back, with review requests that go out.

INDUSTRY 03

Chiropractic & Wellness

Waitlist support, no-show reminders, rebooking nudges and referral follow-up that keep patient conversations moving.

INDUSTRY 04

Restaurants & Hospitality

Reservations, review replies, repeat-customer reminders and cancellation recovery to help keep seats filled.

INDUSTRY 05

Professional Services

Lead capture, follow-up and nurture continue in the background while you focus on the client work.

INDUSTRY 06

Property Inspection

Scheduling through the final report, with every step automated. Already in production across all of Indiana for a service business.

Don't see your industry? Describe the annoying thing.

The menu is a starting point. Ask about watching claim portals or permit filings, sorting your inbox and drafting replies, tracking competitor prices, answering DMs, or reordering inventory before it runs out.

ONE CALL. ONE PERSON. ONE BILL.

Tell us what's keeping you up.

You hire us once.
We bring the whole workforce.

Web, search, marketing, IT, security, bookkeeping, reception, content and development. One team owns the result, with a whole department behind it.

Service trades and partnerships are welcome. Tell us what your business needs, and we'll agree on an arrangement that works for both sides.
